| <input checked="" type="checkbox"/> Schools or universities | <input type="checkbox"/> Media |
| <input type="checkbox"/> Health care providers | <input type="checkbox"/> Local public health departments |
| <input type="checkbox"/> State public health departments | <input type="checkbox"/> Policymakers |
| <input type="checkbox"/> Hospitals, clinics or managed care organizations | <input type="checkbox"/> Other: |

Background on the intervention:

Fast Track is a preventive intervention for young children at high risk for long-term antisocial behavior. The intervention includes a classroom program adapted from the PATHS curriculum for high-risk children selected in kindergarten. This selective intervention reaches parents and children at high risk for conduct problems.

Findings from the systematic reviews:

The National Institute on Drug Abuse (NIDA) lists Fast Track as a model program. See the link below for more information.
